

Activity File: Internal Investigation: Finding the Kit Cat Burglar

- You continue in your role as security analyst at Wonka Corp, investigating the employees potentially selling secret recipes to Slugworth Corp.
- Your manager at Wonka Corp has collected some additional files from Henry and Ruth's computers to help you build your case against them.
- Your manager wants you to analyze this additional data and prepare a combined evidence file for the local authorities.
- You must act fast so the secret recipes don't get into the hands of Slugworth Corp.

Instructions

Go to the following student directory to complete the activity: `find_kit_cat_burglar`

Within this directory are sub-directories for Ruth and Henry. 1. Navigate through the these directories and find all the files that can be considered evidence of Henry and Ruth's crimes.

1. Make a new directory called `Evidence_for_authorities` within the `find_kit_cat_burglar` directory.
2. Move all the evidence files into the `Evidence_for_authorities` folder, then concatenate the files into a single file called `wonka-evidence.txt`. This will be provided as evidence to the local authorities.

Bonus

Four of Ruth's TXT files are not actually a text files, but are secret pictures.

- Find the files and change the file extensions to an image extension.
 - **Hint:** Preview the files to find the one you're looking for.
- Open each file with an image program and note what's in the picture.
